

Viztek CR II System

Viztek Opal CR II is the ideal solution for converting x-ray to digital. The CR is scalable and has a sleek footprint that is easy to fit virtually anywhere. Weighing only 65lbs, the CR II can easily be used in applications where space is limited. An optional vertical wall mount is available, offering multiple installation options. Viztek CR II offers an easy in-field upgrade to go from 20 plates per hour to 70 plates per hour, as your facility volume grows. Viztek CR II is supported by Symphony III post processing software complete with enhanced grid suppression. Viztek's Opal Acquire software is also expandable with Opal PACS. The Opal-CR II brings a small footprint and affordable digital imaging conversion to any clinic.
